

TECHNICAL COOPERATION PROJECT SUMMARY

PROJECT TITLE	PILOTING THE USDA GUIDELINES IN THE HAZELNUT SUPPLY CHAIN IN TURKEY
REGION/COUNTRY	EUROPE / Turkey
PROJECT DURATION	November 20, 2015 – March 31, 2018
FISCAL YEAR & FUNDING LEVEL	FY 2012 USD 4,870,000
PROBLEM TO BE ADDRESSED	In Turkey, the labor-intensive task of harvesting hazelnuts is primarily performed by mobile seasonal agricultural workers, with the extensive involvement of children. Due to poverty, work-related family migration, and inadequate housing facilities children participating in the hazelnut harvest are often unable to access quality education and healthcare. Weak labor law enforcement and a lack of alternative income sources for children's families leave children especially vulnerable to labor exploitation in the hazelnut harvest.
TARGETS	The project will focus interventions in over 1000 hazelnut gardens spread over approximately 10 villages in the Ordu and Sakaray regions, with exact numbers to be determined following mapping and risk assessment of the implementing partners' supply chains. Additional interventions will be implemented in the Urfa region, the source of most seasonal migrant labor in Turkey.
PROJECT OBJECTIVES	<p>Address child labor in the hazelnut supply chain in Turkey through the following objectives:</p> <ul style="list-style-type: none">• Establish and pilot a sustainable program to reduce child labor in the hazelnut supply chain in Turkey through implementation of the USDA's Guidelines for Eliminating Child and Forced Labor in Agricultural Supply Chains• Undertake research, evaluation, and collection of reliable data on child labor, in order to measure the impact of the program on child labor in the Turkish hazelnut supply chain• Document lessons learned and make recommendations for future application of the USDA guidelines, in order to encourage and facilitate their use by other companies and organizations.
SUMMARY OF ACTIVITIES	<p>The project is designed to reach these objectives through the following activities:</p> <ul style="list-style-type: none">• Map the hazelnut supply chains of Olam-Progida and Balsu; assess risks present in the supply chain; and develop a list of project

TECHNICAL COOPERATION PROJECT SUMMARY

intervention areas, in consultation with the implementing partners.

- Conduct a Child Labor Rapid Assessment (CLRA) in the selected intervention areas, in order to establish a baseline for the project.
- Convene a stakeholder consultation in order to: discuss the results of the standards benchmark, supply chain mapping, risk assessment, and CLRA; review the USDA Guidelines and set standards for the project; and define a remediation strategy for identified child labor cases.
- Establish a community-level Child Labor Monitoring System (CLMS) based on the USDA Guidelines, and provide training of local stakeholders to participate in the CLMS.
- Identify best practices currently existing to combat child labor in the hazelnut sector in Turkey and identify linkages with this pilot.
- Create community action plans in cooperation with community stakeholders, based on the findings of project activities.
- Select and train independent third party monitors to verify working conditions in selected hazelnut plantations, assess the efficacy of the CLMS, and conduct an impact-oriented CLRA.
- Advocate for the adoption of a 5-year National Action Plan against child labor in hazelnut production.
